NIHON DENKEI CO.,LTD.

# Corporate Philosophy

## We will contribute to the development of a prosperous society through our measurement technologies.

Our company has cultivated numerous measurement technologies since our foundation, and through these technologies we passionately support our customers as they innovate to improve lives around the world.

### Purpose our Raison d'être

**To contribute to society through our measurement technologies.**

### Vision the future we aspire to

**To transform ourselves into a technical solutions company**

### Values the principles we uphold

**To be steadfast in our commitment to:**

- **Earning and maintaining our customers' trust**
- **Conducting ourselves with integrity and high ethical standards**
- **Providing a work environment where everyone can be happy**
- **Diligently valuing the planet Earth**

## Top Message

I would like to thank you for your continued patronage and support.

Since our establishment in 1950 as a trading company specializing in electronic measuring instruments, we have built the trust of our customers and manufacturers as an independent specialized trading company by constantly providing essential measuring instruments and services required for technological innovation over our 70-plus year history.

Even now, the scope of application of various advanced technologies, including those in the electronics field, continues to expand rapidly, leading to the development and implementation of new communication technologies, the evolution of electric vehicles and automated driving, the expansion of new energy fields, and other improvements in the convenience and safety of society. In this environment, Nihon Denkei has an ever-increasing number of opportunities to play an active role. As a technical partner, we have expanded our network to 49 offices in Japan and 52 offices overseas across 13 countries and regions to support our customers on a global scale.

To meet the growing demand for technical consultation, we have expanded the scope of our response to a wide range of market needs. We now not only provide measuring instruments, but also system products, inspection equipment, testing equipment, and contract testing. Additionally, we have implemented efforts to conduct standardized testing, and have begun holding seminars on measurement technology. Amidst increasing demands for environmental protection, we will enhance our corporate value by continuing to help our partners grow ethically and sustainably. In today's turbulent times, with an ever-changing world, we are determined to contribute to the development of a prosperous and safe society, while being aware of our corporate mission and social responsibility.

We look forward to your continued support and patronage of the Nihon Denkei Group.

President  
**Yukiya Morita**

# Corporate History

1950 Sep	Nihon DenkeiCo.,Ltd. is founded with a capital of 300,000 JPY	2009 Sep	Merges Niigata office into Nagaoka office, North Kyushu into Fukuoka office and Matsuyama into Osaka and or Hiroshima offices
1969 May	Moves the Head Office to 5-14-12, Ueno, Taito-ku, Tokyo	Oct	Bangalore (India) Satellite office established
1990 Sep	Branch office established in Singapore	2010 Sep	Dongguan branch established by Denkei Trading (Shanghai)
1991 Oct	Stock is registered by JSDA (Japan Securities DealersAssociation) to be traded over-the-counter	Nov	JAB (Japan Accreditation Board) and JICQA (JIC Quality Assurance) are taken on for ISO certification and its renewal
	Capital increase to 1,159,170,000 JPY	2011 Mar	ISO9001: Kawasaki office certified
1992 Jul	Nagano and Matsumoto offices established, taking over DaiichiKeisoku's business rights	Apr	Chengdu and Wuhan branch offices established by Denkei Trading(Shanghai)
1996 Jul	In Malaysia, an affiliated company is established (currently aconsolidated subsidiary)	Nov	Indonesian office registered as a sales subsidiary, upgrading are presentative office
1997 May	Established In Thailand, an affiliated company (currently aconsolidated subsidiary)	2012 Jul	Taiwan office established as a sales subsidiary, being converted from a representative office
2000 Feb	ISO9001, Yokohama office is certified	Aug	Chongqing branch office established by Denkei Trading(Shanghai)
2001 Oct	ISO9001 certification is granted to Head Office's sales division,offices in Tokyo, Tokyo South, Tama and Atsugi	Oct	Nanjing branch office established by Denkei Trading(Shanghai)
2003 Aug	An affiliated company in Korea (currently a consolidated subsidiary)	2013 Jul	Changshu branch office established by Denkei Trading(Shanghai)
Dec	ISO14001: Head Office (sales and administration divisions) is certified	Sep	Philippines office registered as a sales subsidiary, upgrading are presentative office
2004 Aug	Acquired Alpha Science, Inc. to open Mishima office	Nov	In Chennai(India), an branch office is established
Dec	Stock is listed on the JASDAQ	2014 Jun	Mirai B Keikaku Co.,Ltd. established as a subsidiary
2005 Jan	Regional Mie office established	2016 Jan	Suzhou industrial park branch office established by Denkei Trading(Shanghai)
Mar	Acquired Aikoh Engineering Co., Ltd. as a consolidated subsidiary	Apr	Acquires ALAE Engineering Co., Ltd. as a consolidated subsidiary
May	Kawasaki office established	Jan	Automotive Market Promotion Department (current Mobility Market Promotion Department) established
Jun	Hitachinaka office established	2017 Jul	Longhua branch office established by Denkei Trading(Shanghai)
Oct	Branch offices in China and Taiwan and a representative officein Suzhou established	2018 Jan	SO17025 Malaysia (Kuala Lumpur) Local corporation certified
Nov	Branch offices in Hanoi (Vietnam), Hanzhou, Xiamen (China)and Busan (Korea) established	Feb	SO9001 product center certified
	Himeji office (currently Hyogo office) opens	Jun	Established a business alliance with TUV Rheinland Japan opens
2006 Jan	Nihon Denkei (Hong Kong) Co.,Ltd. established (currently aconsolidated subsidiary)	Jul	CMS Examination room Denkei-Lab
Feb	A branch office established in Leam Chabang, Thailand	Dec	US subsidiary company (Chicago) established
Mar	Shonan and Koriyama offices established		Denkei Technology R&D (Shanghai)Co., Ltd. listed on the
May	South Kyushu (currently named as Kagoshima) office established		Chinese New Sanba Market
Jul	Qingdao representative office established in China	2019 Mar	Japan Quality Assurance Organization and
Aug	Nihon Denkei Vietnam Co.,Ltd. (currently a consolidated subsidiary) and a Malaysian representative office in Penangestablished	Feb	Nihon Denkei Co.Ltd. ventured to establish a joint venture in Vietnam
Oct	Denkei Science Technology Research Development (Shanghai) Co.,Ltd. established (currently a consolidated subsidiary)	Sep	Tokyo West office established
Nov	ISO17025 certificate received at Denkei Singapore branch office	Dec	Okayama office and Akita satellite established
2007 May	Kanazawa office established		New head office building completed
Jun	Denkei Trading (Shanghai) Co.,Ltd. is established as aconsolidated subsidiary, taking over Shanghai Denkei Measurement Facility Co.,Ltd.	2020 Jan	Tsurumi ND building completed
Jul	Acquires Kazama Denki Kogyo, Inc. to establish Niigata and Nagaoka offices	Apr	Acquires Shin-ei Electronic Measuring Co, Ltd. as a consolidated subsidiary
Oct	Offices in Yamagata, Kariya, representative offices in Manila(Philippines), Ho Chi Minh City (Vietnam) and Matsuyama, aliaison office in Los Angeles are established		Ohita Satelliteoffice established
Nov	Acquired YUAI Electronics Co.,Ltd. as a consolidated subsidiary	2021 Jan	Denkei Science Technology Research Development (Suzhou) Co.,Ltd. established
Dec	In Jakarta (Indonesia), a representative office established	Oct	Denkei Science Technology Research Development (Shanghai) Co.,Ltd. established
2008 Mar	Nihon Denkei India Private Ltd. established (a currently consolidated subsidiary)		Denkei Science Technology Research Development (Xiamen) Co.,Ltd. established
Apr	Changchun branch office established under Denkei Trading(Shanghai)	2022 Apr	Moved to the Standard Market, a new market segment of the Tokyo Stock Exchange
Jul	Kumamoto office established	Nov	Atsugi ND building completed
Dec	A showroom/ store "Measuring Instrument World" opened in Tokyo	2023 Jul	Mirai B Keikaku Co., Ltd. transferred
	ISO9001: Nagoya and Kariya offices certified	Aug	Corporate name of Korean Subsidiary changed to Denkei Korea Co., Ltd.
		Sep	Subsidiary in Europe (Munich, Germany) established

## Trends in consolidated net sales

# Our Strengths

## Customer Base

Since our establishment in 1950 as a trading company specializing in electronic measuring instruments, we have expanded our product lineup to include not only electronic measuring instruments but also environmental testing equipment, precision physical measuring instruments, optical measuring instruments, and scientific analysis equipment, providing products and services that support various fields such as development tools, production technology, and quality control. We have also been actively working with customers to expand our business overseas, and today we have a sales network of 49 offices in Japan and 52 offices overseas in 13 countries and regions, mainly in Asia.

### Automotive

Development of next-generation automobiles, such as connected cars represented by CASE, autonomous driving, and electric vehicles (EV), is being actively promoted. Our main customers are automobile manufacturers and parts/materials manufacturers involved in the development.

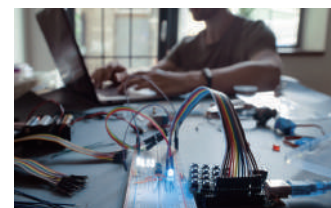

### Semiconductors

Development of miniaturization and power saving is underway to enhance functionality and performance. New material development and manufacturing technologies are also being developed. Our main customers are manufacturers of semiconductors, semiconductor components, and semiconductor production equipment.

### Consumer Electronics

Home appliances that make our lives richer and more convenient are still under active development in pursuit of comfort and convenience. We have many business relationships with such home appliance manufacturers both in Japan and overseas.

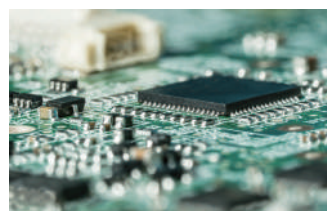

### Universities and Research Institutes

Universities that develop new technologies such as IT and electronics, prefectural industrial technology centers that support local companies, and national research institutes related to telecommunications and defense are also potential customers.

### Machine Tools & Robots

Automation is progressing at production sites to improve efficiency and reduce labor shortages. Further technological development is required for higher precision and quality control. The machine tool and robot industries are also major customers.

### Electronic Components

The advent of the IoT society and the era of 5G telecommunication is driving a growing demand for electronic components in everyday devices. We have a large number of business partners in Japan and overseas in the manufacturing of these electronic components.

### Heavy & Construction Machinery

In recent years, the construction machinery industry has been actively working on automation and electrification, and the development of environmentally friendly products is progressing. We accurately grasp the needs of our customers and link them to our business.

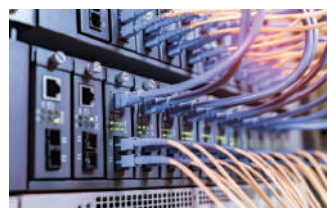

### Entertainment

New technologies such as virtual reality and augmented reality are being developed for gaming devices that allow people to enjoy their leisure time. The electronics industry is also a large market for our company.

### Medical Devices

In the medical device industry, in addition to the thriving sector of treatment devices, there is also a rising demand for increasingly sophisticated technology oriented toward early diagnostics, detection, and prevention. Our experience and know-how are also utilized in the field of medical devices.

### Information and Communication Equipment

Since the spread of the Internet, PCs, smartphones, and tablet devices have become a necessity in our daily lives. Manufacturers related to such information and communication devices are also major customers.

### Environmental Energy

Global warming caused by carbon dioxide (CO<sub>2</sub>) emissions has become the main concern for the entire world. The market for renewable energy as an alternative is expanding rapidly, and manufacturers of solar and wind power and of energy storage devices are major customers.

## Trust and Achievements

# Half a Century

## With Measuring Instruments

Since our establishment, we have accumulated knowledge, experience, and know-how as a trading company specializing in measuring instruments to provide optimal products and services to our customers. We have built a stable financial base through the accumulation of trust and achievements. As a leading company in the measurement industry, we will continue to focus on providing services that exceed customer expectations.

## Largest number of items handled and suppliers in the industry

We handle tens of thousands of products from over 5,000 suppliers annually. Our own product center always has 1,600 items in stock and is ready to deliver them to our customers as soon as possible.

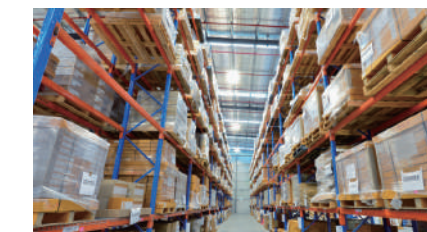

### More than 5,000 suppliers per year

Since our establishment, we have been a general trading company of electronic measuring instruments, boasting a top-class market share and scale in Japan. In order to meet the demands of our customers, we collaborate with numerous suppliers in Japan and overseas.

### Tens of thousands of items handled

We handle tens of thousands of products. From research and development to testing, evaluation, and mass production, we make proposals that meet the needs and challenges of our customers.

### 1,600 items available on demand

We have a system for immediate delivery of products, mainly electronic measuring instruments, which are in high demand by our customers from domestic and overseas suppliers and are held in stock at our Product Center.

## High level of expertise and technical capabilities

With our many years of experience, we are able to provide highly specialized services, from proposals related to various types of measurement to support after equipment has been installed.

To ensure that our customers can use our products with peace of mind, we have a calibration company within our group, and we have a system in place that allows our local technical staff to provide support overseas as well.

## Ability to propose measuring instruments

Community-based offices and experienced staff capable of making optimal proposals from more than 5,000 suppliers.

## Calibration and maintenance technology

Support system with subsidiaries in Japan specializing in calibration services and overseas subsidiaries with technical staff

## Contract Testing

Expanding Contract Testing of Automotive Products in China  
Supporting testing of autonomous driving technology in Japan

## Business promotion

Business promotion with the ability to support the development of next-generation automobiles and make proposals for high-speed 5G communications and IoT technologies

## Solution Promotion Department

### Secondary Battery Charging and Discharge Test Equipment System Coordination

Our expert team, which is well versed in charge/discharge equipment essential for secondary battery research and development, will propose the most suitable system for you. We procure various types of testing equipment for use in R&D and manufacturing processes from Japan and overseas, and provide support from system coordination to equipment installation.

- ◎ Equipment for material evaluation
- ◎ Equipment for module evaluation
- ◎ Equipment for cell evaluation
- ◎ Equipment for pack evaluation

### Engineering Trading Company of Scientific Products and Environmental Testing Equipment

Our technical staff is armed with the expertise in physical and chemical equipment to provide customers with the best products for their needs including X-ray inspection equipment, elemental analysis equipment, and other physical and chemical equipment. In the area of environmental testing equipment, we can propose products that comply with domestic and international standards and regulations, as well as provide installation and maintenance services for testing equipment. We are also well versed in various types of contract testing, so please feel free to contact us.

- ◎ Vehicles / Simulation / Test Equipment
  - Salt spray/combined cycle tester
  - Weathering Testers
  - Fatigue/Endurance Testers
  - Material Testing Machines
  - HiLS
  - NCAP testing, etc.
- ◎ Physical and Chemical Instruments
  - Electron microscope
  - X-ray fluorescence
  - FT-IR
  - Elemental analyzers
  - microscopes
  - Coordinate measuring machines, etc.

### ◎ Overseas Support

For your overseas capital investment, please contact our experienced team. We provide consistent support from equipment export to local after-sales support.

### ◎ EMC Solution

We offer a wide range of EMC solutions, including anechoic chambers and measurement system-related equipment for various tests.

- ◎ Real Vehicle and In-vehicle Equipment Field
  - CISPR12/25 standard test
  - ISO11452 standard test
  - Private standards support
- ◎ Consumer Products
  - CISPR14 standard test
  - CISPR22/32 standard test
  - IEC/EN61000Series standard test

### ◎ Optical Measurement and Evaluation Test Support

The Kanagawa Laboratory is a facility that specializes in testing CMS(camera monitor system) that conforms to international standards(UN-R46). Our facility is equipped with a test environment and measuring instruments necessary for the development of the electronic mirror.

(D-LAB) <https://www.n-denkei.co.jp/d-lab/>  
(This facility is a partnership laboratory of TUV Rheinland Japan Ltd.)

## Mobility Market Promotion Department

### 01 Regulations & Standards

We propose suitable equipment for evaluation and related processes, achieving solutions to customer requirements in compliance with domestic and international standards, as well as regulations in product development. We also use our network to conduct surveys of overseas products and efficiently support customer compliance with international standards.

### 02 Overseas Support

Through our strong relationship with our suppliers in Japan and their reliable and proven products, we are able to provide consistent support to our overseas customers. This support ranges from proposal of products and test equipment, to helping navigate import and export procedures, to installation, training, maintenance, and repair through our distributorship agreements in ASEAN.

### 03 Import Product Support

We support our overseas customers as they introduce various products and equipment to Japan. In addition to import agency services, we provide support for installation, repair, and after-sales service of equipment by our professional staff. We have a system in place that allows our customers to rely on us by utilizing our network of overseas offices.

### ◎ Products & Services

#### Vehicle testing and safety testing for next-generation vehicle development

- AD/ADAS Test
- AEB Test
- NCAP/UNR Test
- GNSS

#### Solution proposal for next-generation vehicle development

- Driving Simulator
- ADAS Simulator
- V2X · IoT
- Multi-Channel Data Logging

#### Various testing and rental services

- Various NCAP Test
- Various UNR Test
- Vehicle Evaluation Test
- Motor Dynamo Test

## NI Business Development Department

Authorized Distributor

### Optimal Proposal

We offer the best combination of NI's software, including LabVIEW, and a wide variety of hardware to match our customers' needs. In addition to NI products, we also provide comprehensive management and operations support, including measurement and test solutions, test data management, and in-house test systems, as well as system development. By using testing systems with the latest technology, we will help our clients drive innovation and sustainable growth.

### Industry Solutions

#### Semiconductor

- Verification of 5G devices
- Power Consumption Performance Test
- Wafer Level Reliability Test
- LDO Measurement
- STS

#### Automotive

- Battery Test
- ADAS/Automatic Driving Verification
- In-Vehicle Data Logging
- Radar Sensor Test
- ECU Functionality Test

#### Electronics

- State Monitoring
- Sound/Vibration Data Collection
- HIL Test
- NFC Verification

#### Research/Education

- Large-Scale Experiment
- Academic research
- Mechanical Test
- Academic License

### As a Technical Partner

We are able to meet a wide variety of customer needs, such as the prompt procurement of goods and the overseas relocation of R&D and mass production facilities, by utilizing our extensive sales and procurement network of 49 domestic and 52 overseas offices. Additionally, we utilize our accumulated knowledge from many years of experience working with NI products to minimize the risks of a device failing due to limitations and failure conditions not apparent in its specifications and recommend the right product for any environment.

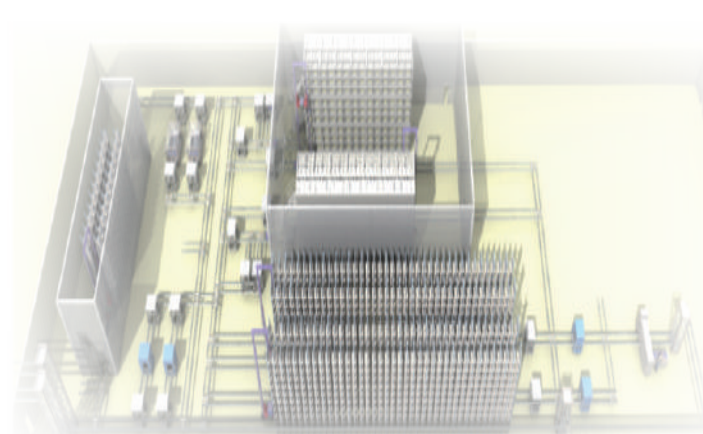

## Cross Engineering Department

Through our accumulated trust and expertise, we at Denkei provide instruments for measuring, testing, and evaluation to support forward-looking businesses aiming to reach the cutting-edge of their field.

As the No. 1 trading company in sales of superior measuring instruments in Japan and abroad, we offer comprehensive engineering services for systems that combine industrial image analysis with pre-verification equipment at the development stage and beyond.

Innovating to lead the way in solution engineering.

### Deep Learning Image Analysis Software Cognex VisionPro Deep Learning

Cognex VisionPro Deep Learning is a deep learning image processing software designed for the manufacturing industry. The combination of deep learning technology and VisionPro software enables applications that have been difficult to address with traditional machine vision systems. We can propose total solutions tailored to your facilities.

#### Guidance

- Detect/Identify Image Features

- Available for OCR

#### Inspection

- Strike Detection

- Scratch Detection, etc.

#### Identification

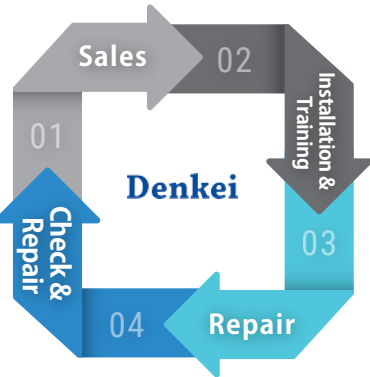

- Classification and identification of products, etc.

# Overseas Operation

Network of 52 locations in 13 countries and regions	Repair, calibration and technical support in each country	Sub-contract testing on a global basis	Exhibition around the world through global subsidiaries
Customs expertise	Solution support	Multi-national procurement source	Product PR and procurement in each country

## Repair and Calibration Bases in Asian Countries

Repair/Calibration Lab in China	Repair/Calibration Lab in Taiwan	Repair Lab in Korea	Repair Lab in Thailand
Repair Lab in Vietnam	Repair/Calibration Lab in Malaysia	Repair Lab in Indonesia	Repair Lab in Philippine
Repair Lab in India	Repair/Calibration Lab in Singapore		

**Vietnam calibration service business (joint venture company with JQA)**  
JQA Calibration Vietnam Co., Ltd (Established: Nov 2018)

- Electrical measurement (multimeter, calibrator, variable resistor, pressure tester)
- Power supply related measurement (AC power supply, DC stabilized power supply)
- Measurement (push-pull gauge, torque wrench, torque tester, gauge)
- Environmental test (thermostatic chamber, thermometer, hygrometer, vibration tester)
- Others (pressure gauge, scale, weight, microscope etc.)
- Measurement equipment calibration service, education and business seminars on measurement, etc.

**JQA (Japan Quality Assurance Organization)**  
Established in 1957. Certification body representing Japan. The instrument calibration service started in 1963 and has an outstanding track record of more than half a century.

## China Contract Testing Center

40 technical staff. Entrusted test items.

Environment al test room	<ul style="list-style-type: none"> <li>● Thermal shock, thermostatic, hydrostatic, high temperature test</li> <li>● Dust test, rainfall test, Xenon weather meter test</li> <li>● Low pressure, high pressure steam, temperature change test</li> <li>● Vibration test, impact test, pulling length test, drop test</li> <li>● Salt water spray test, corrosion test</li> </ul>
Electric test room	<ul style="list-style-type: none"> <li>● Voltage withstand, insulation resistance test</li> <li>● Electrical performance test</li> <li>● Electrostatic discharge test</li> </ul>
VOC test room	<ul style="list-style-type: none"> <li>● VOC test</li> </ul>

New energy test room	<ul style="list-style-type: none"> <li>● Electronic component</li> <li>● Battery performance</li> <li>● Vehicle environment test</li> </ul>
Inertia characteristics test room	<ul style="list-style-type: none"> <li>● Resonic inertial characteristic measurement</li> </ul>
Cooperative university	<ul style="list-style-type: none"> <li>● Shanghai Jiaotong University</li> </ul>

## Overseas procurement

49 offices in Japan and 52 offices overseas  
We support your global business by sharing information.

- Immediate on-site response
- Excellent after-sale service
- Cost reduction
- Development of local manufacturers

## About export and import

Import and export require various documents and complicated procedures. With our rich experience, the International Center will quickly support your trade.

- RoHS compliant
- CE marking
- Fumigation
- CCC (China Compulsory Certificate)
- China Energy Label
- PEZA system in Philippines
- TDS in India
- BOI in Thailand
- DGT-1 in Indonesia

Flexible response

Transactions in multi-national currencies/JPY/USD, international forwarding, export packing, certificate of origin, fumigation proof, L/C, intermediary trade and more.

Export Administration Regulations

Some applicable products (export-restricted products) can be exported without applying for a single export to the Ministry of Economy, Trade and Industry.

Prompt Export/Import

Through our years of export and import experience in the measuring instrument industry, we can ensure our products are delivered across international borders with maximum expediency.

## Examples of Overseas Solution

Basic Technology	Custom Order	Evaluation Method	Recommendation	IoT
Optical/Precision/Mechanical/Chemistry/Electric & Electronics/Measurement & Control	Manufacturing device/Inspection device/Special processing device/Analysis verification device/Software development	Sub-contract testing (Measurement, environmental, vibration, reliability etc.), Commissioned analysis (Field analysis, applied analysis, electromagnetic field, fluid, structural analysis, etc.)	Battery/Battery material-related verification device (Secondary battery, fuel cell, solar cell)/LED related verification device/Environmental analysis related verification device/Science and chemistry, optical, precision related verification device/Image inspection device/-Various package software	Measurement equipment in the test lab, factory measurement data collection platform, plant environmental data collection, charge/Discharge measurement system for battery cell/Battery pack
