

Up to 30GHz

Shielding Tent

ANTIEMI SR4030T/SR7030T

5G compliant

A shielding tent covers frequency band up to 30GHz.

Cost effective, short lead time and space-saving.

The high-performance shielding tent, perfectly suits for 5G communication equipment development.

5G OTA test

Wi-Fi test

Pre-test for
IoT/M2M

Emission control

Immunity test

Features

High Performance Shielding

- Single layer : 40dB from 150 kHz to 30 GHz
- Double layer : 70dB from 500 kHz to 30 GHz

Two sizes available

- W2,000 x D2,000 x H2,000 (mm)
- W2,000 x D3,000 x H2,000 (mm)

Easy assemble and special tool-free

- Hanging on the pipes with velcros.
- Easy set-up.
- Foldable and space-saving.

Reliable product and management system

- Achieving high quality as "Made in Japan"
- Performance test on all products before shipment.

Standard specification

Item	Specification	
	Width x Depth	Height
Internal Dimensions (mm)	2,000×2,000	2,000
	2,000×3,000	
Entrance(mm)	W850×H1,765 ※ Open/close with zippers	
Shielding Effectiveness	Guaranteed Values SR4030T (Single layer) Over 40dB attenuation (150kHz to 30GHz) SR7030T (Double layer) Over 70dB attenuation (500kHz to 30GHz)	

Options

Item			Specification
Power supply	input	Cable length	Ask for details
		Circuit breaker	
		Line filter	
	output	AC outlet	
Ventilation fan			
LED illumination			

- Specifications and options can be added upon request. (We might not be able to meet your request)
- Specifications and designs are subject to change without notice.
- The material may change color over time but it does not affect shielding performance.
- Life cycle of a zipper is approximately 1,000 to 2,000 times depends on how to use, make sure it opens and closes properly.
- Indoor use only. Please avoid heat and humidity place.

⚠ Safety precautions: Please read the user manual and use the product correctly.
