Fanless Xeon E-2278GEL / Core i5 9500TE /
Core i3 9100TE / Celeron G4900T installed
Embedded computer
BX-M2500 Series

Features

- Ninth-generation Xeon, Core i5, Core i3, Celeron processor adopted

This product adopts the CPU that saves power consumption and also provides high computing and graphic performances.

Embedded-type CPU makes the stable supply possible.

- "Power failure protection system" features power-off without OS shutdown

Equipped with the "Power failure protection system" function that protects data and prohibits writing to storage in the event of power failure. Along with the lockdown (disk writing suppression) function of Windows IoT Enterprise, power can be safely turned off without a shutdown process. Moreover, file system damage or data damage caused by sudden power failure can be avoided.

- High-security design contributes to a highly reliable system

The latest security functions such as TPM2.0 and Secure Boot, as well as CONTEC's original functions including the USB Boot Protect are provided. This product is designed with the high security required for industrial applications in mind.

- CONTEC-customized BIOS provides useful utility

Useful utility of BIOS *1 customized by CONTEC is provided. The "CONTEC Fast Boot" achieves Windows startup in 10 seconds.*2

The "Disk Copy" function provides secure disk backup at the BIOS level, and also supports backup in file format or compressed file format. We also offer the CONTEC tools "BIOS update tool" for updating BIOS.*3

- Fan-less design reduces maintenance work

The product is fan-less to ensure a totally spindle-less design that simplifies maintenance, relieving the concern about dust or foreign matter to get into the product. Moreover, along with minimized use of degrading parts greatly reduce maintenance work.

- Major types of peripherals are supported with rich interfaces

It has a variety of extended interface such as DVI-I x 1, DisplayPort x 1, 1000BASE-T x 2, USB 3.2 Gen2 x 4, USB 2.0 x 2, serial (RS-232C) x 4 and DIO x 1.

It has two slot-in type of 2.5-inch SATA disk slots, providing the ability to separate data from the operating system, as well as the convenience of being able to use one slot for system startup and the other for maintenance or for taking home system logs or collected data.

- The attachment fitting and cable ties prevent problems caused by cable disconnections

For connectors with no locking mechanism such as USB cable, unnecessary trouble can be avoided by the use of cable ties for prevention of cable disconnection.

*1 For details, see "BIOS Setup" in the manual.

*2 It is the actual measured value when Windows 10 and HORM function are enabled at the factory. Time may vary depending on configuration. Note that TXE, TPM, Network Stack, and SMART Self Test are not supported when the CONTEC Fast Boot is enabled.

*3 Contact your retailer for more information.

This product is a fan-less and high-performance embedded type computer with the nine-generation Intel® CPU processor. Along with its power-saving and high-performance features, this product has a rich variety of interfaces and achieves fan-less operation by way of natural air-cooling.

The Xeon E-2278GEL, Core i5 9500TE, Core i3 9100TE or Celeron G4900T processor can be selected for the CPU.

Various interfaces such as dual LAN / USB 3.2 Gen2 / DisplayPort / DVI-I / RS-232C / DIO and the slot-in 2.5 inches SATA hard disk bay unit being installed, this product is best suited to displaying images including digital signage.

Embedded-type CPU has been adopted.

The use of readily available parts ensures the product to be applied easily. In addition, Contec-customized BIOS allows support to be provided at the BIOS level.
