The product is a module with 8-channel differential analog inputs and 4-channel digital outputs.

It provides programmable input range on all analog channels (± 150 mV, ± 500 mV, ± 1 V, ± 5 V, ± 10 V, ± 20 mA, 0 to 20 mA and 4 to 20mA) and digital output can be set alarm output with Short-circuit protection and overload protection.

Each analog channel is allowed to configure an individual range and has 240 Vrms high overvoltage protection.

Each analog input can be programmed to accept voltage or current as input depending upon the position of the corresponding jumper.

The sampling rate of product is changeable; there are fast mode and normal mode for your consideration.

The product is also qualified for 4kV ESD protection as well as 2500 VDC intra-module isolation.
