

Screen Protective Sheet
10-Sheet Set
IPC-CV series

Model	Screen size
IPC-CV6	6.4 inches
IPC-CV	10.4 inches
IPC-CV12	12.1 inches
IPC-CV15	15 inches

* Specifications, color and design of the products are subject to change without notice.

Specification

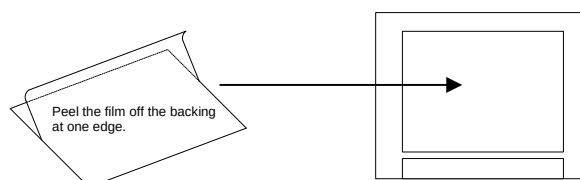

Operating Temperature : 0~50°C

Humidity : 20~80%RH (No condensing)

Sticking Procedure

1. Before applying a film to the screen, first remove dust and stain from the screen by wiping with a soft cloth. (moistened with water-diluted neutral detergent for badly stained portions.)

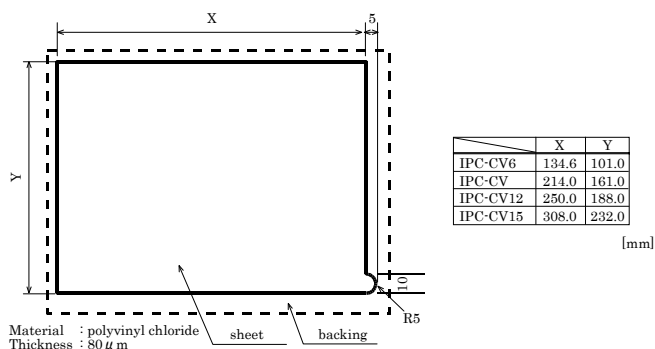

2.

- (1) Apply the edge of the film to the top of the display area.
- (2) Apply the rest of the film to the display area while gradually peeling the film off the backing.

<Tip> Rub then surface of the applied film with your finger, from one side of the film to the other, to squeeze out air from below the film. This will stick the film well.

Dimension

Notes

The sheet is polyvinyl chloride film coated with acrylic pressure sensitive adhesive. Since the sheet does not protect the screen from sharp objects, do not touch the screen with anything sharp or pointed such as a mechanical pencil. The sheet cannot also protect the screen from reducer, ammonia, or strong chlorinated solvent.

When applying the film, be careful not to stretch it hard, or it will be extended.

When removing the film from the screen, do not use a pointed object. Doing so may scratch the touch panel
