

## 100KSPS 16-bit Analog Input Unit for USB AI-1664LAX-USB

\* Specifications, color and design of the products are subject to change without notice.

### Features

#### High-precision analog input 64 channels, each 4 channels for digital I/O and counter 1 channel

This product has analog input (10 $\mu$ sec / channel, 16-bit, 64 channels), analog input control signal (LVTTTL level 3 channels), digital I/O (each 4 channels for LVTTTL level) and counter (32-bit, LVTTTL level 1 channel). Capable of setting the analog input at single-ended input 64 channels and differential input 32 channels.

#### The start/end of sampling can be controlled by software, comparison of conversion data, an external trigger, etc.

You can select from software, comparison of conversion data or an external trigger to control the start of sampling. You can select from completion of sampling for a specified number of sessions, comparison of conversion data, an external trigger or software to control forcibly the end of sampling. The sampling cycle can be selected from the internal clock or an external clock.

#### Equipped with buffer memory (1K data) that can be used in the FIFO or RING format

The analog input block contains buffer memory (1K data) that can be used in the FIFO or RING format. This allows for background analog input that does not depend on the operation status of the software or PC.

#### Digital filter function included to prevent misdetection due to chattering on external signals

A digital filter is included to prevent misdetection due to chattering on the control signal (external trigger input signal, sampling clock input signal, etc.), digital input signal and counter input signal. (except from external clock input signal and counter gate signal)

**Compatible with PCI / PCI Express bus board in it's design. Common connector shape and pin assignment with PCI / PCI Express bus board**  
This product has the common connector shape and pin assignment with PCI bus board AD16-64(LPCI)LA, PCI Express bus board AI-1664LA-LPE so you can use the common cables and accessories, it is easy to migrate from the existing system \*1.

#### Compatible to USB1.1/USB2.0

Compatible to USB1.1/USB2.0 and capable to achieve high speed transfer at HighSpeed (480 Mbps).

This product is a USB2.0-compliant analog input unit that extends the analog input function of USB port of PCs. This product is multi-channels and multifunction type with 16-bit analog input 64 channels (single-ended input 64 channels or differential input 32 channels), digital I/O and counter function. This product carries buffer memory for 1K of data, allowing sampling to be performed in a variety of trigger / clock conditions.

As there is compatible with PCI bus-compatible board AD16-64(LPCI)LA and PCI Express bus-compatible board AI-1664LA-LPE in terms of connector shape and pin assignments, it is easy to migrate from the existing system.

Using the bundled API function library package [API-USBP(WDM)], you can create Windows application software for this board in your favorite programming language supporting Win32 API functions, such as Visual Basic or Visual C/C++.

It can also collect data easily without a program when the data logger software [C-LOGGER] stored on the attached CD-ROM is used. With plug-ins for the dedicated libraries, this product also supports MATLAB and LabVIEW.

#### USB HUB function, the CONTEC's USB supported products (Max. 4) can be used.

This product has the USB HUB function. \*2 Max. 4 AI-1664LAX-USB can be used in 1 USB port of PC. When you use 4 or more AI-1664LAX-USB, you can do by connecting AI-1664LAX-USB to the another USB port of PC side. Also, you can connect the CONTEC's USB supported products other than AI-1664LAX-USB to the USB port of AI-1664LAX-USB. \*3\*4

#### Software-based calibration function

Calibration of analog input can be all performed by software. Apart from the adjustment information prepared before shipment, additional adjustment information can be stored according to the use environment.

#### Data logger software, Windows compatible driver libraries are attached.

The attached data logger software [C-LOGGER] enables the graph display of recorded signal data and file saving without a program. Also, driver library API-USBP(WDM) that makes it possible to create applications of Windows is attached.

#### Plug-ins for the dedicated libraries, this product also supports MATLAB and LabVIEW.

We offer a dedicated library [ML-DAQ], which allows you to use this product on MATLAB by The MathWorks as well as another dedicated library [VI-DAQ], which allows you to use the product on LabVIEW by National Instruments. These dedicated libraries are available, free of charge (downloadable), on our web site.

\*1 There are some differences of the specifications between this product and AI-1664LA-LPE, AD16-64(LPCI)LA. For more details on this, refer to "Chapter7, Difference from AI-1664LA-LPE, AD16-64(LPCI)LA"

\*2 This product cannot be stacked up for installation.

\*3 Do not connect the device other than that of CONTEC's USB to the USB port included on the AI-1664LAX-USB. Otherwise, this may cause a failure or malfunction.

\*4 When connecting multiple units with USB HUB function and set up them, do one at a time and complete setup for the previous unit before starting to do the next unit.

Specifications

Hardware specifications

| Item                                      | Specification   |
|---|---|
| <b>Analog input</b>                       |   |
| Isolated specification                    | Non-isolated  |
| Input type                                | Single-Ended Input or Differential Input (by software)  |
| Input channel                             | 64ch (single-ended input), 32ch (differential input)  |
| Input range                               | Bipolar ±10V  |
| Absolute max. input voltage               | ±20V  |
| Input impedance                           | 1MΩ or more   |
| Resolution                                | 16Bit   |
| Non-Linearity error *1 *2                 | ±5LSB   |
| Conversion speed                          | 10μ sec/ch  |
| Buffer memory                             | 1k Word   |
| Conversion start trigger                  | Software / external trigger   |
| Conversion stop trigger                   | Number of sampling times / external trigger/software  |
| External start signal                     | LV TTL level (Rising or falling edge can be selected by software)<br>Digital filter (1μsec can be selected by software) |
| External stop signal                      | LV TTL level (Rising or falling edge can be selected by software)<br>Digital filter (1μsec can be selected by software) |
| External clock signal                     | LV TTL level (Rising or falling edge can be selected by software)   |
| <b>Digital I/O</b>                        |   |
| Number of input channels                  | Non-isolated input 4channels (LV TTL level positive logic)  |
| Number of output channels                 | Non-isolated output 4channels (LV TTL level positive logic)   |
| <b>Counter</b>                            |   |
| Number of channels                        | 1channel  |
| Counting system                           | Up count  |
| Max. count                                | FFFFFFFh (Binary data, 32bit)   |
| Number of external inputs                 | LV TTL level : 2 (Gate/Up)/ch,<br>Gate (High level), Up (Rising edge)   |
| Number of external outputs                | LV TTL level : 1/ch,<br>Count match output (positive logic, pulse output)   |
| Frequency response                        | 10MHz (Max)   |
| <b>USB</b>                                |   |
| Bus specification                         | USB Specification 2.0/1.1 standard  |
| USB transfer rate                         | 12Mbps (Full-speed), 480Mbps (High-speed) *3  |
| Power supply                              | Self power *4   |
| Attached AC adaptor (POA200-20-2)         | 90 - 264VAC 5.0VDC±5% 2.0A (Max)<br>Cable length : about 1.5m, AC Cable length : about 1.5m                             |
| <b>Common section</b>                     |   |
| Number of terminals used at the same time | 63 terminals (Max) *5   |
| Power consumption (Max)                   | 5VDC 670mA  |
| Operating condition*6                     | 0 - 50°C, 10 - 90%RH (No condensation)<br>* When using the attached AC adaptor POA200-20-2, it is 0 - 40°C              |
| Physical dimensions (mm)                  | 180 (L) x 140 (D) x 34 (H) (No protrusions)   |
| Weight                                    | 400g (Not including the USB cable, attachment)  |
| Connector                                 | 68 pin 0.8mm pitch connector<br>HDRA-E68W1LFD1-SL [HONDA] or equivalent to it   |
| Attached cable length                     | USB Cable 1.8m  |
| Standard                                  | VCCI Class A, FCC Class A,<br>CE Marking (EMC Directive Class A, RoHS Directive)  |

- \*1 A linearity error approximately 0.1% of full-range may occur when operated at 0°C or 50°C ambient temperature.
- \*2 At the time of the source use of a signal which built in the high-speed operational amplifier.
- \*3 The USB transfer speed depends on the host PC environment used (OS and USB host controller).
- \*4 The supplied current is insufficient in the bus power. Please use the attached AC adaptor (POA200-20-2).
- \*5 As a USB hub is also counted as one device, you cannot just connect 63 USB terminals.
- \*6 To suppress the heating, ensure that there are spaces for ventilation (about 5cm) around this product.

AC adaptor environmental condition (environmental specification)

| Item   | Specification   |
|--|---|
| Input voltage range                            | 90 - 264VAC   |
| Rated input current                            | 300mA   |
| Number of frequency                            | 50 - 60Hz   |
| Rated output voltage                           | 5.0VDC  |
| Rated output current                           | 2.0A (Max)  |
| Dimension (mm)                                 | 47.5 (W) x 75 (D) x 27.3 (H) (No protrusions)                                     |
| Weight   | 175g  |
| Operating temperature                          | 0 - 40°C  |
| Operating humidity                             | 20 - 80%RH (No condensation)  |
| Life expectancy                                | 4 years at the ambient temperature 40°C (When 100VAC is input and 1.3A is output) |
| Allowable time of short interruption           | 15ms (Max) (When 100VAC is input and 1.3A is output) *1                           |
| Floating dust particles                        | Not to be excessive   |
| Corrosive gases                                | None  |
| Voltage corresponding to the attached AC cable | 125VAC 7A   |

- \*1 When the short interruption occurs and the defective operation of the equipment is generated, please insert the power supply of the equipment after pulling out it.

Physical dimensions

Physical dimensions (AI-1664LX-USB)

Physical dimensions of attached AC adaptor (POA200-20-2)

Support Software

Windows version of analog I/O driver API-AIO(WDM)

[Stored on the bundled CD-ROM driver library API-USBP(WDM)]  
The API-AIO(WDM) is the Windows version driver library software that provides products in the form of Win32 API functions (DLL). Various sample programs such as Visual Basic and Visual C++, etc and diagnostic program useful for checking operation is provided.  
For more details on the supported OS, applicable language and how to download the updated version, please visit the CONTEC's Web site.

Data Logger Software C-LOGGER

[Stored on the bundled CD-ROM driver library API-USBP(WDM)]  
C-LOGGER is a data logger software program compatible with our analog I/O products. This program enables the graph display of recorded signal data, zoom observation, file saving, and dynamic transfer to the spreadsheet software "Excel". No troublesome programming is required.  
For more details on the supported OS, applicable language and how to download the updated version, please visit the CONTEC's Web site.

Data Acquisition library for MATLAB ML-DAQ  
(Available for downloading from the CONTEC web site.)

This is the library software which allows you to use our analog I/O device products on MATLAB by the MathWorks. Each function is offered in accordance with the interface which is integrated in MATLAB's Data Acquisition Toolbox. See CONTEC's Web site for details and download of ML-DAQ.

Data acquisition VI library for LabVIEW VI-DAQ  
(Available for downloading from the CONTEC web site.)

This is a VI library to use in National Instruments LabVIEW. VI-DAQ is created with a function form similar to that of LabVIEW's Data Acquisition VI, allowing you to use various devices without complicated settings. See CONTEC's Web site for details and download of VI-DAQ.

### Cable & Connector (Option)

Shielded cables with two-ended connector for 68-pin half-pitch connector

: PCB68PS-0.5P (0.5m), PCB68PS-1.5P (1.5m)

Shielded cables with single-ended connector for 68-pin half-pitch connector

: PCA68PS-0.5P (0.5m), PCA68PS-1.5P (1.5m)

68/96-pin conversion shielded cable for analog input/output

: ADC-68M/96F (0.5m)

\* Two sets of cables are required to use both connector CNA and CNB.

### Accessories (Option)

Terminal Unit for Cables (M3 x 96P) : DTP-64A \*1\*3

Screw Terminal (M3 x 68P) : EPD-68A \*2\*3\*4

Screw Terminal (M3 x 96P) : EPD-96A \*1\*3\*4

Screw Terminal (M3.5 x 96P) : EPD-96 \*1\*3

BNC Terminal Unit (analog input 32ch) : ATP-32F \*1\*3

BNC Terminal Unit (analog input 8ch) : ATP-8 \*1\*3\*5

USB I/O Unit Bracket for X Series : BRK-USB-X

AC adaptor (input: 90 - 264VAC, output: 5VDC 2.0A)  
: POA200-20-2 \*6

AC-DC power supply unit (input: 85 - 132VAC, output: 5VDC 3.0A)  
: POW-AC13GY

AC-DC power supply unit (input: 85 - 264VAC, output: 5VDC 2.0A)  
: POW-AD22GY

DC-DC power supply unit (input: 10 - 30VDC, output: 5VDC 3.0A)  
: POW-DD10GY

DC-DC power supply unit (input: 30 - 50VDC, output: 5VDC 3.0A)  
: POW-DD43GY

\*1 ADC-68M/96F optional cable is required separately.

\*2 PCB68PS-0.5P or PCB68PS-1.5P optional cable is required separately.

\*3 Two sets of cables are required to use both connector CNA and CNB.

\*4 "Spring-up" type terminal is used to prevent terminal screws from falling off

\*5 Can be used in CNA channels 0 - 7 or CNB channels 32 - 39.

\*6 It is the same as the one appended to the product. Please buy it necessary for maintenance.

\* For details on the range channels available to each terminal panel, see Figure 3.2 "Connecting example of option".

\* Check the CONTEC's Web site for more information on these options.

### Difference from AI-1664LA-LPE and AD16-64(LPCI)LA

| Item   | AI-1664LAX-USB   | AI-1664LA-LPE                               | AD16-64(LPCI)LA   |

Pin Assignment of interface connector (Single-Ended Input)

|                                     |  |
|-------------------------------------|--|
| Analog Input00 - Analog Input63     | Analog input signal. The numbers correspond to channel numbers.  |
| Analog Ground                       | Common analog ground for analog input signals.   |
| AI External Start Trigger Input     | External trigger input for starting analog input sampling.   |
| AI External Stop Trigger Input      | External trigger input for stopping analog input sampling.   |
| AI External Sampling Clock Input    | External sampling clock input for analog input.  |
| Digital Input00 - Digital Input03   | Digital input signal.  |
| Digital Output00 - Digital Output03 | Digital output signal.   |
| Counter Gate Control Input          | Gate control input signal for counter.   |
| Counter Up Clock Input              | Count-up clock input signal for counter.   |
| Counter Output                      | Count output signal.   |
| Digital Ground                      | Common digital ground for digital I/O signals, external trigger inputs, external sampling clock inputs, and counter I/O signals. |
| Reserved                            | Reserved pin   |
| N.C.                                | No connection to this pin.   |

⚠ CAUTION

- Do not connect any of the outputs and power outputs to the analog or digital ground. Neither connect outputs to each other. Doing either can result in a fault.
- If analog and digital ground are shorted together, noise on the digital signals may affect the analog signals. Accordingly, analog and digital ground should be separated.
- Leave "Reserved" pins unconnected. Connecting these pins may cause a fault in the board.

Pin Assignment of interface connector (Differential Input)

|                                     |  |
|-------------------------------------|--|
| Analog Input00 - Analog Input31     | Analog input signal. The numbers correspond to channel numbers.  |
| Analog Ground                       | Common analog ground for analog input signals.   |
| AI External Start Trigger Input     | External trigger input for starting analog input sampling.   |
| AI External Stop Trigger Input      | External trigger input for stopping analog input sampling.   |
| AI External Sampling Clock Input    | External sampling clock input for analog input.  |
| Digital Input00 - Digital Input03   | Digital input signal.  |
| Digital Output00 - Digital Output03 | Digital output signal.   |
| Counter Gate Control Input          | Gate control input signal for counter.   |
| Counter Up Clock Input              | Count-up clock input signal for counter.   |
| Counter Output                      | Count output signal.   |
| Digital Ground                      | Common digital ground for digital I/O signals, external trigger inputs, external sampling clock inputs, and counter I/O signals. |
| Reserved                            | Reserved pin   |
| N.C.                                | No connection to this pin.   |

⚠ CAUTION

- Do not connect any of the outputs and power outputs to the analog or digital ground. Neither connect outputs to each other. Doing either can result in a fault.
- If analog and digital ground are shorted together, noise on the digital signals may affect the analog signals. Accordingly, analog and digital ground should be separated.
- Leave "Reserved" pins unconnected. Connecting these pins may cause a fault in the board.
