**Wireless Model**

**Features**

**- Ultra-compact design about as large as two business cards**

This is the smallest [110 (W) × 90 (D) × 29 (H)] and lightest PC in the series. The product can contribute significantly to the miniaturization of equipment while not hindering equipment design regardless of the installation location. VESA-compliant mounting holes (100 × 100 mm) are available, and an optional attachment enables DIN rail mounting. Choose the installation method that best suits your needs.

**- USB Type-C port for improved convenience and expandability**

The product includes a Type-C port, the latest USB standard. The included Type-C port supports DP Alt Mode (DisplayPort Alternate Mode) and USB PD (Power Delivery), enabling data communication, video output, and power supply simultaneously with a single cable. Connecting to a docking station also makes it possible to include various other interfaces.

**- Helps reduce running costs and energy consumption**

This product uses the x5-E3940 low power consumption Intel Atom processor platform to achieve low power consumption while still providing sufficient performance.

**- Fan-less design reduces maintenance work**

The product is fan-less to ensure a totally spindle-less design that simplifies maintenance, relieving the concern about dust or foreign matter to get into the product. Moreover, along with minimized use of degrading parts greatly reduce maintenance work.

**- Wireless connections to various devices via wireless LAN and Bluetooth**

The wireless model is equipped with both wireless LAN and Bluetooth. The ability to connect to various peripheral devices wirelessly makes the product ideal for use as an IoT gateway and for edge computing.

**- Safety design required for embedded applications**

For Windows 10 IoT Enterprise 2019 LTSC installed type, it is possible to use the WF

\*1 function of OS. It is designed for safety required for embedding purpose, for example, prohibiting unwanted writing to the HDD or SSD with WF function will relieve the concern about the writing limits to the HDD or SSD and prevent an unintentional system alteration.

\*1 UWF (Unified Write Filter) is a function of Windows 10 IoT Enterprise 2019 LTSC.

They protect the disk from being actually written by redirecting the writing to RAM.

**Supported OS**

Windows 10 IoT Enterprise 2019 LTSC 64bit (Japanese / English / Chinese / Korean)

This product is a fanless embedded PC equipped with an Intel Atom® x5-E3940 (1.6 GHz) processor. Despite the ultra-compact design about as large as two business cards, the product boasts a wide operating temperature range (-30°C to +50°C) as well as excellent performance.

The product includes a rich array of interfaces, including USB Type-C (widely used in mobile devices), DisplayPort, USB 3.2 Gen 1 (USB3.0) × 2, and LAN × 2. The wireless models are equipped with wireless LAN and Bluetooth® for easy connection to digital devices, making the BX-U200 Series ideal as an IoT gateway device for connecting to peripherals.

Embedded-type CPU has been adopted. The use of readily available parts ensures the product to be applied easily. In addition, Contec-customized BIOS allows support to be provided at the BIOS level.
