

This compact plug-in converter (isolator) receives two analog input and outputs a signal in proportion to their sum or difference.  
For example, WSP-ADS/SBS can be used for addition of flow rates or the calculation of temperature differences, speed differences, etc.

## Features

- ★ Dielectric strength of 2000Vac between input, output and power supply
- ★ Both AC and DC power supply are available
- ★ Long operating time
- ★ Easy maintenance by plug-in structure
- ★ CE approved
