

This compact plug-in signal converter accepts signal with square-law characteristics and provides optically isolated signal output, corresponding to the square root. It amplifies and converts the selected DC input to the selected DC output. It can use for extraction of square root of differential pressure type / open-channel flowmeter (linearization).

Features

- ★ Dielectric strength of 2000Vac between input, output and power supply
- ★ Both AC and DC power supply are available
- ★ Accuracy at 0.1% FS, Response time 100ms
- ★ Easy maintenance by plug-in structure
- ★ CE approved
